

Legility's Legal Team Manager (LTM) is an adept solution for managing cross-functional teams focused on supporting legal and compliance efforts. This proprietary tool provides meaningful, advanced data analytics to corporate leaders.

Our philosophy is simple: Tools should be implemented quickly and provide value immediately. Legal Team Manager can be set up in days.

Key Features

Internal Activity Tracking

You don't know what you don't track. Legal departments are typically overburdened and understaffed, and traditional time tracking is onerous. Most legal departments need the ability to show leaders where their staffing needs are and how operational improvements can create value. Legal Team Manager is a low-burden legal team tracking platform that demonstrates how Legal Ops is making progress for everyone.

Main Dashboard

All-Inclusive Matter and Team Management

Legal Team Manager provides fully customized, lightweight matter tracking. Users can track all matters intersecting with members of the legal team, including internal-only issues and nontraditional legal department efforts.

Task Management and Workflow Automation

As more agile process methodologies are embraced, Legal Team Manager allows a forward-looking approach to task management and workflow automation. It provides custom task and assignment creation for legal teams to collaboratively estimate how much work is necessary to get a task or matter "done," and to track it to closure within a modified Scrum framework. Practice area leaders can even see their future workloads via fully integrated dashboards, from which they can incorporate workflow automation to quickly and easily redistribute work. Legal Team Manager helps get things done the most efficient way possible.

Interoperability and Data Visualization

Legal Team Manager ties in all the important data about your legal activities. The platform has an open API and pre-built connectors to bridge and automate processes within existing systems, and can also integrate current billing data, contract management system data, and more. It provides fully custom dashboard visualizations, representing a composite of what is tracked in Legal Team Manager with all the other data you have.
